

ENERGOINFRA[®]

Electric Infrared Heater

INFRARED

HEATING IS BOTH COST EFFECTIVE AND HAS A QUICK WARM-UP TIME

Energoinfra is an all-round, supplementary or overall heater for conservatories, balconies, patios and is also effective as a spot/zone heater in workshops, warehouses etc. Energoinfra is approved in splash-proof IP44 design for wet and dry rooms and out-door installations. Therefore you also may use it in bathrooms and utility rooms. Ceiling or wall mounted.

Energolnra is used often as a supplementary heater in conservatories, balconies, patios etc. It is also suitable for spot and zone heating in workshops and warehouses etc. It may be fitted in wet and dry areas such as bathrooms and washing rooms. The infra heater is approved in splash-proof IP44 Δ design for wet and dry rooms and for out-door installations.

Energolnra is constructed from corrosion protected sheet steel which assures a long life span. The casing is in white powder coated finish with anodised reflectors of aluminium. The protective guards and the heating elements are made of stainless steel.

Energolnra is available in 3 models, EIR500, 1000 and 1500 at 230-240V, see table. It can be ceiling or wall mounted. The supplied fixing brackets are adjustable and can be angled in different fixed positions. The heater can also be suspended on wires, chains etc.

Energolnra is approved for permanent installation by an authorised electrician. Cable connections are to a 4mm² terminal in the junction box at the end of the heater. Connections between several heaters are possible.

Heat control is simply carried out with use of our thermostats or where a large number of heaters are fitted, one of our automatic control panels may be used, (see separate brochure).

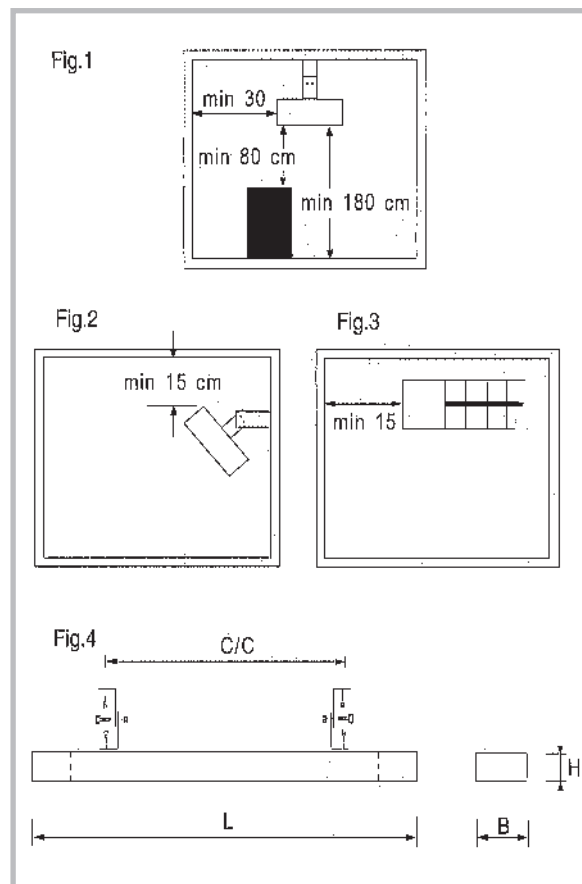

Type	230-240V~	L	W	H	C/C	kg
EIR 500	500-544 W	70 cm	7,5 cm	4 cm	50 cm	1,5
EIR 1000	1000-1089 W	117 cm	7,5 cm	4 cm	81 cm	2,0
